

PROFICIENCY TEST IN MOTIVATIONAL INTERVIEWING ACCORDING TO MITI 4.2.1

Recording id:	Name:	Target:	Date:
46489060	Erin Lawson	Reduce use of opioids	2024-03-04

Global Ratings

Technical Components	
Cultivating Change Talk This rating reflects your use of MI skills to highlight and strengthen the	(1-5)
patient's own reasons for making a change.	2
Softening Sustain Talk This rating reflects your use of MI skills to validate the patient's	(1-5)
barriers to change and guide them to consider possible reasons for change.	3
Relational Components	
Partnership This rating reflects your use of skills designed to build a collaborative working relationship with your patient, consistent with the Spirit of MI.	(1-5)
working relationship with your patient, consistent with the Spirit of Mi.	3
Empathy This rating reflects your use of skills designed to express warmth and	(1-5)
understanding of your patient within their unique circumstances, consistent with the Spirit of MI.	2

Behaviour Counts	Total
Giving information	9
Persuade	2
Persuade with Permission	3
Questions	14

Simple Reflection	3
Complex Reflection	0
Affirm	4
Seeking Collaboration	1
Emphasizing Autonomy	0
Confront	0

Summary of indices of coded skills demonstrated in the interview

Indices of proficiency		Lev	/el
		Fair	Good
Simple + Complex Reflections Questions	= 0.21	(≥1.0)	(≥2.0)
This is the ratio of your reflections to your questions. Within MI, we aim for reflections to exceed questions, ideally with 3 or 4 (or more) reflections for every question.			
Complex Reflections Simple + Complex Reflections	= 0.00	(≥0.40)	(≥.50)
This is the ratio of your complex reflections to your total number of reflections. Generally speaking, having a higher percentage of complex reflections suggests a better quality of MI interaction.			
Total MI Adherent = Seeking Collaboration + Affirm + Emphazising Autonomy	= 5		
This is the total number of utterances or interactions within the encounter that were consistent with MI			
Total MI Non Adherent = Confront + Persuade	= 2		
This is the total number of utterances or interaction within the encounter that were inconsistent with MI			

Relational Component: <u>Empathy + Partnership</u> 2	= 2.50	(≥3.5)	(≥4.0)
Technical Component: <u>Cultivate Change talk + Softening Sustain talk</u> 2	= 2.50	(≥3.0)	(≥4.0)

Guidelines on the meaning of Empathy and Partnership

Value	Proficient in relational skills	Things to consider in future use of MI
1 – 2.5	Low	Risk of not being able to help the clients
2.5 – 3.5	Fair	Continued training is recommended
3.5 - 5.0	Good	Likely helpful for clients

Guidelines on the meaning of technical variables

Value	Proficient in technical skills	Things to consider in future use of MI
1 – 2.5	Low	Risk of not being able to help the clients
3.0	Fair	Continued training is recommended
3.5 – 5.0	Good	Likely helpful for clients

Clinician strengths:

The clinician is asking about benefits of the medication, for example 05:10 "So when we look at..." It affects the Softening Sustain Talk Score negatively.

12:36 - 13:30 The clinician is dominating the conversation by talking for over one minute without involving the client. It affects the Partnership Score negatively.

The clinician is giving advice without asking for permission by doing a Persuade, for example 13:50 "One of the minor things you could do is..." It affects the Partnership Score negatively.

If some questions had been rephrased as reflections and particularly as Complex reflections the Empathy score had been affected in a positive way and also the Partnership score given the client more space for how to respond.

Important areas for improvement:

The clinician is enhancing the client's thoughts by doing an Affirm, for example 07:50 "That is true...Those are good points..." It affects the Partnership Score positively.

The clinician is asking evoking Questions, for example 07:55 "What do you think the benefits would be..." It affects the Cultivating Change Talk Score positively.

The clinician is asking about the downsides of the medication, for example 09:00 "What are the downsides..." It affects the Cultivating Change Talk Score positively.

The clinician is enhancing the client's reasons for making a change by doing a Complex Reflection, for example 10:00 "So it sounds like the constipation is a problem..." It affects the Cultivating Change Talk Score positively.

The clinician is involving the client by doing a Seek Collaboration and Persuade With Permission, for example 13:25 "What do you think?" It affects the Partnership Score positively.

How was the coding performed?

The interview between the practitioner and the client (or actor) is reliably assessed according to a manual developed and validated for assessing how well MI is performed. The assessment is made by professional coders at MIC Lab whose reliability is regularly checked.
